

## PROJECT SHEET

# Gas Distribution Service Provision

**Client:** Origin Energy Asset Management

**Location:** Queensland

## Description

Comdain delivers operations maintenance and construction services for the entire Envestra gas distribution networks in Brisbane. Service Provision support is delivered across semi-rural and inner city congested locations.

## Procurement, Maintenance, Construction and Commissioning

- Maintenance and construction of gas mains and services
- Twenty-four hour emergency services
- Maintaining records of faults and maintenance
- Supply & installation of network
- Planning and Scheduling of Operational Activities
- Overall Program Management
- Individual Project Management
- Community and Stakeholder Management

## Highlights & Challenges

- Significant investment in specialist plant & equipment
- Implementation of advanced specialist training
- Multi-skilling of workforce
- Realignment / rationalisation of workforce
- Traffic management and environmental, health and safety challenges of undertaking inner city works

## Overall Performance

- Significant improvement in the work quality standards through applying best practice operational solutions
- Seamless delivery of diverse works with complex technical, environmental and extensive community consultation or stakeholder challenges
