

PROJECT SHEET

Supply Main and Reticulation – Water & Recycled Water

Client: Yarra Valley Water/Vic Urban

Location: Aurora

Description

Comdain was responsible for the procurement and installation of a 12km water and recycle distribution system into Vic Urban's latest industry leading residential development:

- Water and recycled water supply main
- Water and recycled water reticulation system
- 600mm and 450mm MSCL welded pipe
- Common trenching for water, recycled water and gas distribution mains

Highlights & Challenges

- Creative alternatives to alignment and pipe design resulted in significant cost breakthroughs
- Community, landholder and key stakeholder management was a critical success factor
- Embraced a highly consultative approach to landowners, personalizing solutions for the construction and commissioning phases. Attention to minor details resulted in a high level of stakeholder satisfaction

Overall Performance

- Commissioned 15-20% ahead of time
- Project delivered on budget
- Safety: ZERO LTI
- Excellent stakeholder management, a critical success factor for exceptional delivery of this project
- Exemplary IR track record for this contract and across the entire Comdain business: ZERO days industrial actions

Intelligent Doers, Dependable Delivery
