

PROJECT SHEET

Gas Infrastructure Construction

Client: SP AusNet, Energex, Alinta, Envestra/Origin Energy

Location: Victoria and Queensland

Description

Comdain is a leading gas network infrastructure construction service provider. We undertake diverse projects across semi-rural and inner city congested locations.

Procurement, Design, Construction and Commissioning

- Supply & installation of network
- Materials Procurement and Stores Service
- Planning and Scheduling of Operational Activities
- Project Management
- Subcontractor Management
- High Pressure Regulator Construction / Installation
- City Gate Construction / Installation
- Management Gas Supply / Installation Contractors
- Community and Stakeholder Management

Highlights & Challenges

- Stakeholder and community consultation - ensure exceptional performance
- Environmental management - apply alternative construction approaches to environmentally sensitive areas such as significant vegetation or river crossings
- Traffic management and environmental, health and safety challenges of undertaking brown field construction projects in inner city areas

Overall Performance

- Reputation for exceptional operational management and an ability to deliver projects with complex technical, environmental or extensive community consultation / stakeholder requirements
- 90% repeat business with blue-chip private and public corporations
- Specialist pipeline infrastructure skills enable Comdain to confidently deliver exceptional value for money
